

nightowl App Storyboard

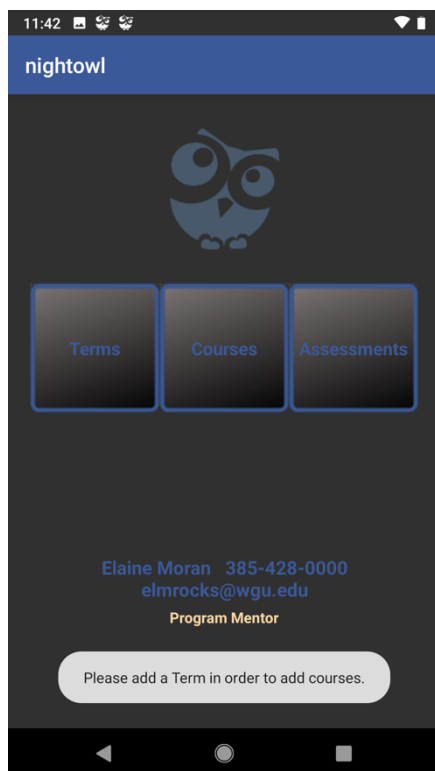

Main menu (Home). Tap on the “tip” message & it will move on to the Mentor form →

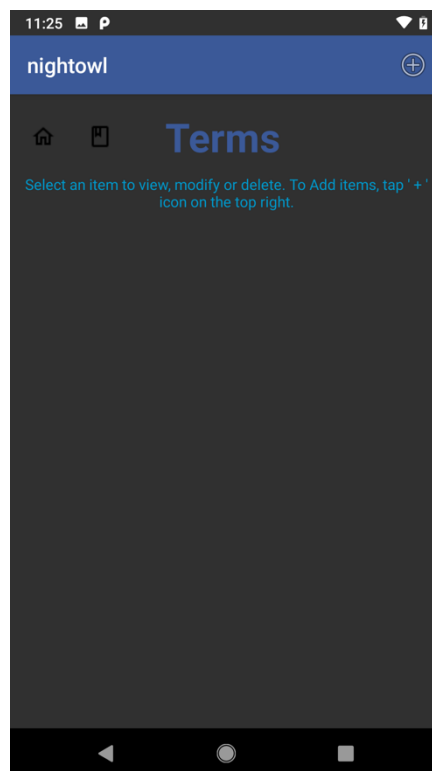

After filling out the form & saving, it will display the info on the home screen →

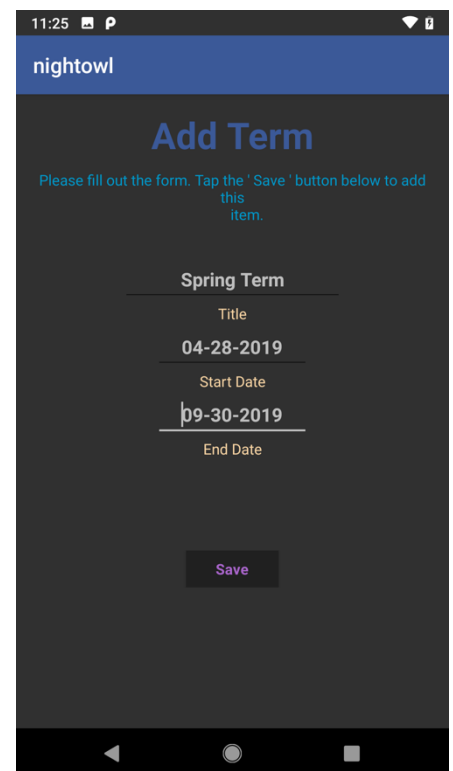

The info can be changed or viewed larger when “Program Mentor” is tapped.

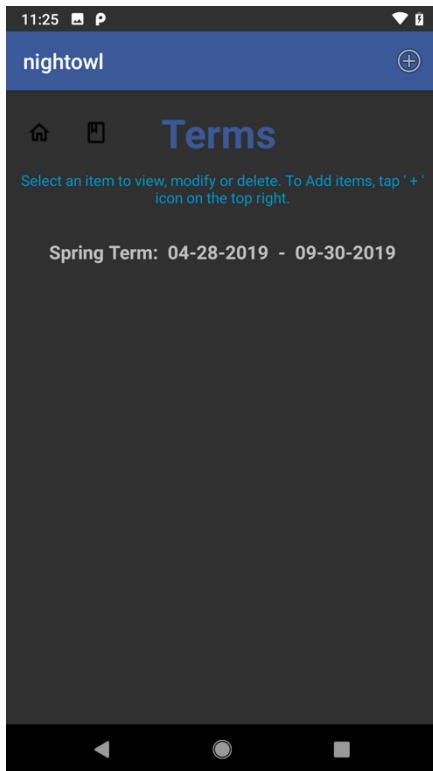

“Courses” button will be disabled when there are no Term items. Assessments button will be disabled as well when course database is empty.

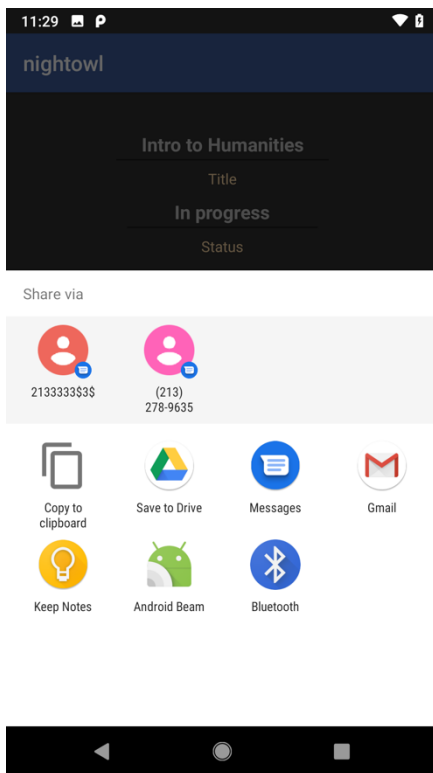

This is the activity that shows when the Term button is tapped from the main menu. Tapping on the “+” opens the “Add Term” form →

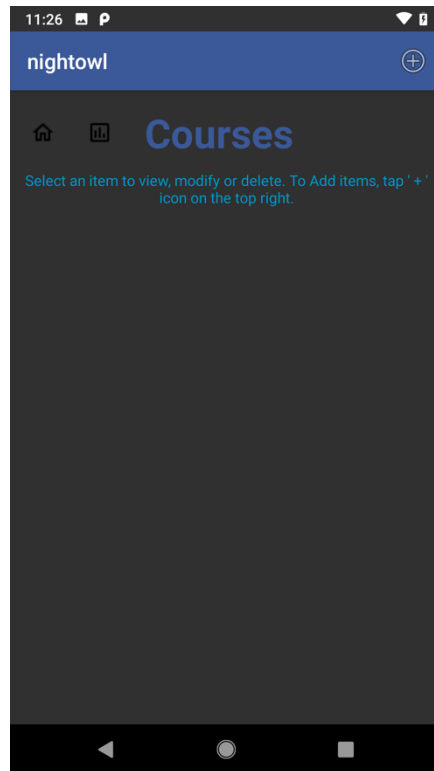

“Add Term” form. Date pickers will pop up when the date fields are tapped.

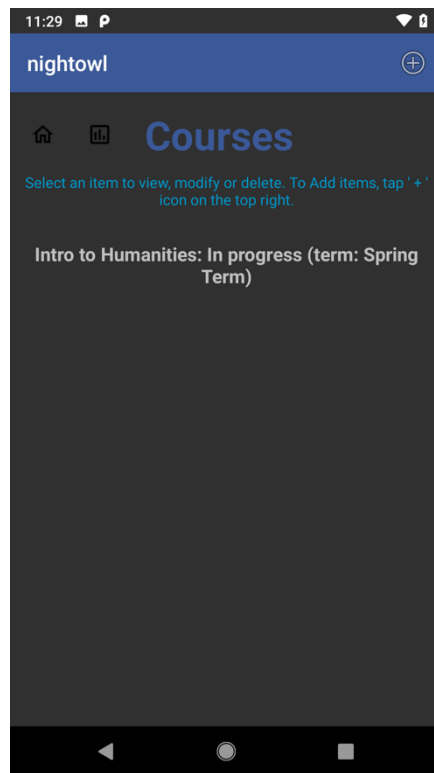

Once the Term info is saved, it will go back to the Terms Screen & display the term Title with start & end dates. The icons on the top left are short cuts to "home" & "courses".

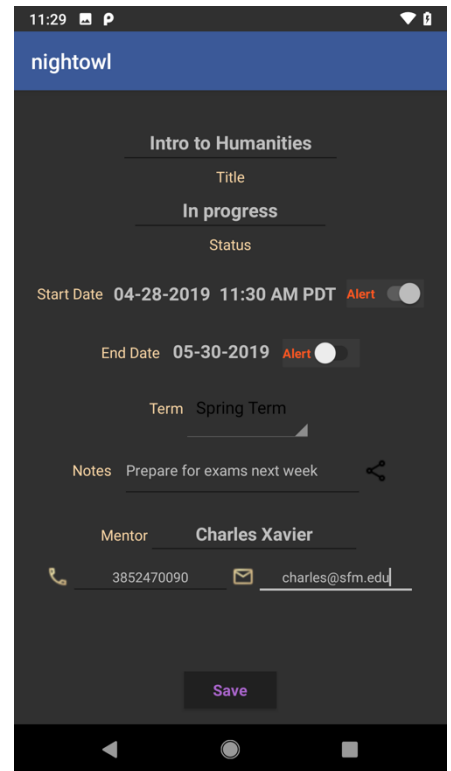

This pops up when the note share button is tapped.

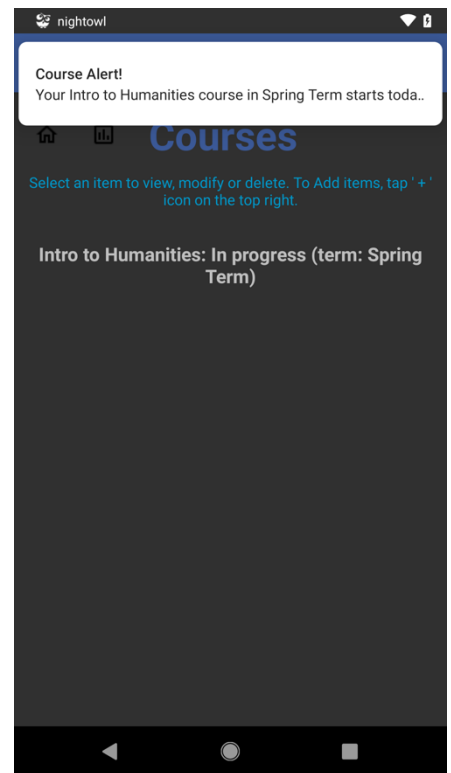

This is the "Courses" screen that will show up when a term is added & the "Courses" button is tapped, either from "home" or the short cut found on "Term" screen. Tap on the '+' to add course →

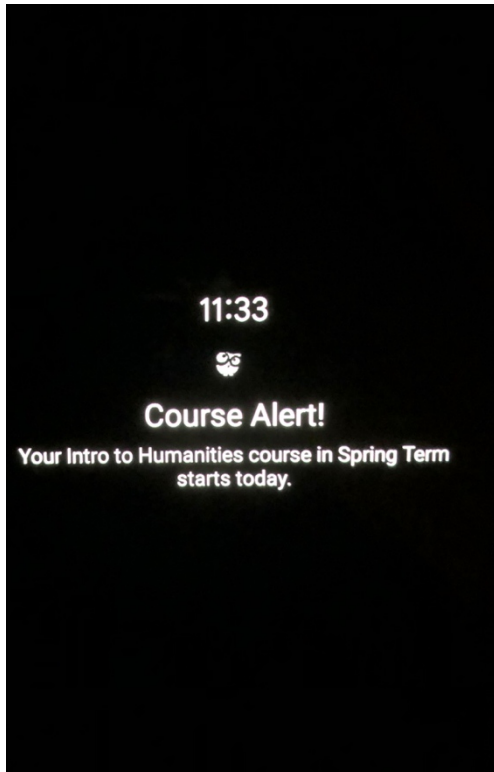

When the course info is saved, it will return to the "Courses" screen & show title, status & associated term. (Icons on top left are "Home" & "Assessment" shortcuts.)

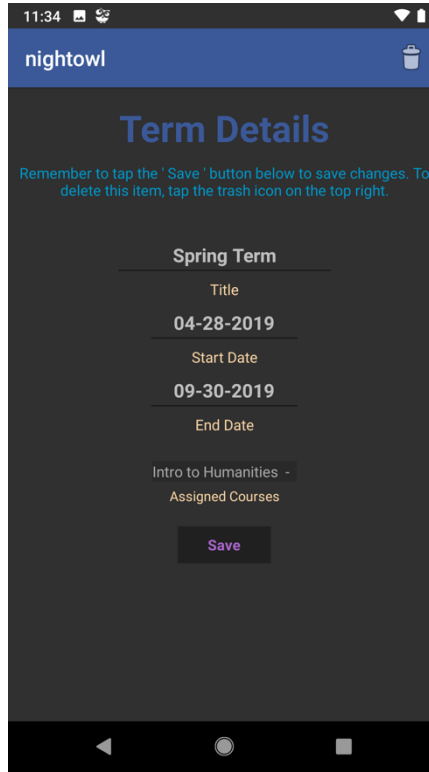

"Add Course" form, lets a user add title, status, set dates & alarms, choose an associated term, write & share notes via SMS/ email & add course mentor info.

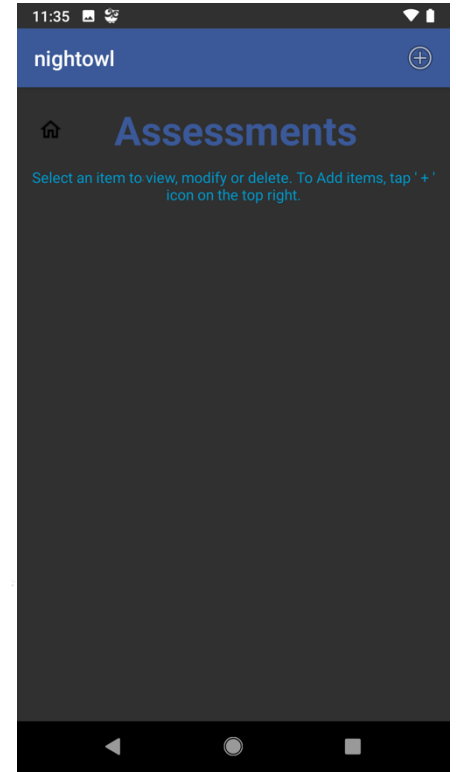

An alert was set at 11:30 (as shown from the top of this photo), to show a sample of a notification.

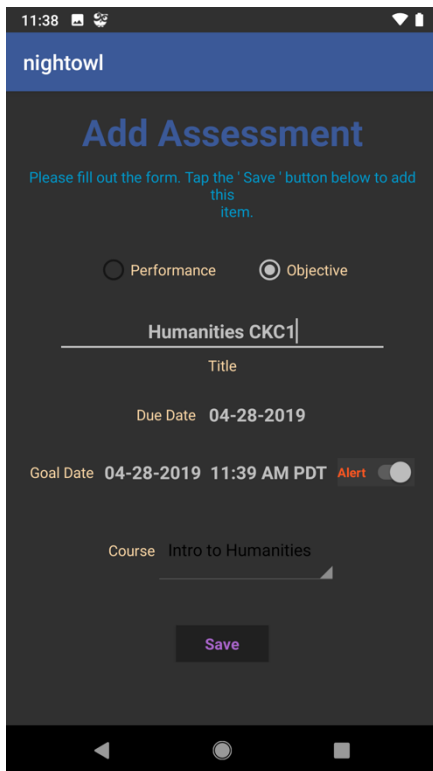

An alert will show up even when the app is closed & phone is on standby, & this is what it looks like.

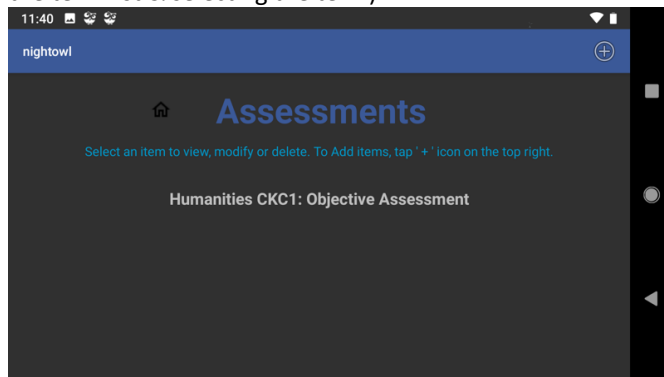

Once a course is added, it will show up on a mini monitor located at the bottom (above the 'Save' button) of the associated term. (This shot is taken after saving the course & going back to the term list & selecting the term).

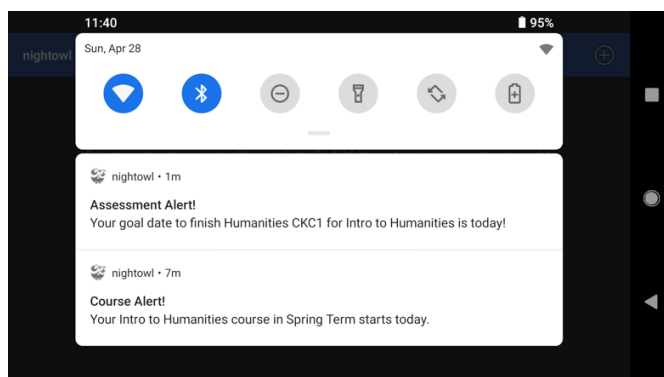

Pressing the assessments button after adding a course will open this screen.

This is the "Add Assessment" form. Just like on "Terms" & "Courses" screen, tapping the '+' on the top right will open the add item screen.

After adding an assessment, it will go back to the "Assessments" screen and list the title & the type of assessment. (This is the landscape view).

This is the alert that was set for the assessment, as well as the course alert that was set previously. (Screenshot after swiping down from screen).
